DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,895,428 (Berry).

Berry discloses a cervical intervertebral prosthesis system comprising different prostheses 11 each having a pair of slide surfaces 29, 43 configured to form a hinge (Figs. 2 and 12-19). The different prostheses have different positions of the center of hinge movement and slide surfaces with different radii of curvature (Figs. 2 and 12 and col. 8, line 18 - col. 9, line 8). The prostheses of the system have different extents in an anterior-posterior direction. The steps of the method are inherent in an ordinary use of the device. Specifically, given the system of implants of Berry, a competent surgeon would not think of implanting the prostheses without first determining the measurements of the affected joint and then selecting appropriate prostheses based on the measurements. The particular size of below 18 mm and of below 15 mm of the slide surface radius (claims 12 and 13) has not been given weight in the present method claims because such limitations do not affect the method in a manipulative sense.

Allowable Subject Matter

Claim 15 remains allowable over the prior art of record.

Response to Arguments

Applicant's arguments filed 10 November 2008 have been fully considered but they are not persuasive.

Applicant argues that amended claim 7 is allowable for the same reasons as claim 15. However, claim 15 recites, *inter alia*, the specific relative position or orientation (i.e., the limitations setting forth the caudal/cranial directions) of the prostheses. Applicant has failed to include such limitations in amended claim 7. Accordingly, the specific implant that is to necessarily have a smaller extent in an anterior-posterior direction and the specified slide surface, etc., has not been set forth. As such, the rejection over Berry has not been overcome.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
